- 7. (Amended) A platform according to claim 3, in which at least one of the subsystems is arranged to communicate directly with a selected other subsystem via a respective specific data interface and in which others of the subsystems are arranged to communicate with a selected other subsystem via an object bus.
- 9. (Amended) A platform according to claim 7, in which the said subsystems arranged to communicate via an object bus are arranged, in response to each new call, to read resource data from the resource broker.
- 17. (Amended) A method according to claim 14, in which, for at least one of the multiplicity of subsystems, step (a) is repeated in response to an event in the respective subsystem.
- 19. (Amended) A method according to claim 1 in which the communication of resource data between subsystems is mediated by a resource broker.
